## Education

- 2011–2015 **PhD**, *University of Pennsylvania*, Philadelphia, PA, GPA: 3.84.  
Electrical and Systems Engineering
- 2011–2013 **MSc**, *University of Pennsylvania*, Philadelphia, PA, GPA: 3.77.  
Electrical Engineering
- 2006–2010 **BSc**, *Sharif University of Technology*, Tehran, IRI, GPA: 3.74.  
Electrical Engineering (Telecommunications focus)

## PhD thesis

- title *Optimal Control of Epidemics in the Presence of Heterogeneity*
- Advisor Saswati Sarkar
- Co-Advisor Santosh S. Venkatesh
- Committee George J. Pappas, Victor M. Preciado, Olgica Milenkovic (UIUC)
- description I showed how heterogeneity significantly affects the spread of epidemics, and how it should be leveraged to control their spread. I developed a taxonomy of heterogeneity in epidemic spread: heterogeneity can manifest itself in the contact rates (structure) of the network, in the resources available to agents, and in the epidemic itself. For each case, I mathematically modeled a real-world process, validated the model, identified the control mechanisms and constraints, and characterized optimal control strategies for the use of those resources. In each case, I used simulation and real-world trace data to show how the structures I analytically derived can significantly affect the spread and cost of epidemics.

## Awards

- NYC ASCENT Fellowship February '16
  - **Runner Up**, *Fels National Public Policy Challenge*, Philadelphia, PA, USA March '15
  - **Winner**, *Penn Public Policy Challenge*, Philadelphia, PA, USA March '15
  - Research Fellowship for PhD studies, University of Pennsylvania October '10
  - Offered admission to Sharif's MSc program as a special talent January '10
  - Iranian National Elite Foundation Scholarship September '06
  - Best combined result in the history of Iran's national university entrance exams: June '06
    - **1<sup>st</sup>/600k** Azad Math-Physics
    - **1<sup>st</sup>/250k** Nat. Foreign Languages
    - **15<sup>th</sup>/400k** Nat. Math-Physics
- This led to awards from Iran's President, Minister of Higher Education, and Minister of Education

---

## Research Experience

- 2016–Current **Postdoctoral Associate**, *Yale University*, New Haven, CT.  
Working with Professor Leandros Tassiulas at the Yale Institute for Network Science
- Working on the effect of coalitions on the evolution of opinions, and the effect of network structure and attention limits on optimal advertising
  - Working on the emergence of collective identity as part of the DARPA Next Generation Social Science (NGS2) initiative
- 2015–2016 **Postdoctoral Associate**, *Cornell University*, Ithaca, NY.  
Working with Professor Qing Zhao and Professor Lang Tong in the Electrical and Computer Engineering (ECE) department
- Writing book on the charge scheduling of electric vehicles for the Foundations and Trends in Networking series (with Zhe Yu and Prof. Lang Tong), *in draft stage*
  - Work on the control of influence in groups of teams as part of the Network Science CTA with Prof. Qing Zhao (1 paper)
  - **Teaching sessions** of a graduate course on Digital Signal Processing, and **TA-ing** a graduate course on Markov Decision Processes
  - Coursework on electrical market operation, with a focus on ERCOT
  - Completion of a 6-week course on effective mentoring
- 2011–2015 **Research Assistant**, *University of Pennsylvania*, Philadelphia, PA.  
Working with Professor Saswati Sarkar and Professor Santosh Venkatesh in the Electrical and Systems Engineering (ESE) department
- **Thesis Research** on the optimal control of epidemics, with applications to epidemiology, network security, and delay-tolerant network message delivery
  - **Additional Research** on the control of influence on opinion networks and on electrical market operation
  - **Teaching Assistant** for Fourier Analysis (ESE325), & Digital Signal Processing (ESE576)  
I held recitations, office hours, posed and graded homework & exam problems and projects
  - Participation in a 3-month course on college teaching in 2014, leading to a certificate
- 2014–2014 **Research Intern**, *NEC Labs America*, Cupertino, CA.  
Working with Dr. Rakesh M. Patil in the Energy Management (EM) department
- I proposed optimal stochastic smart-grid management policies focused on pricing grid-scale batteries
  - We wrote a paper we presented at IEEE ACC and submitted a patent application and an additional invention record

---

## Memberships

- 2008–Current IEEE
- 2014–Current IEEE Control Systems Society

## Invited Talks

- "Optimal Control of Epidemics in the Presence of Heterogeneity", Electrical and Computer Engineering Department, **Cornell University**, July 2015
- "Optimal Control of Epidemics in the Presence of Heterogeneity", Bansal Lab, Biology Department, **Georgetown University**, July 2016
- "Optimal Control of Epidemics in the Presence of Heterogeneity", Yale Institute for Network

- Science Seminar, Yale Institute for Network Science (YINS), **Yale University**, July 2016
- “Optimal Control of Epidemics and Opinions in the Presence of Heterogeneity”, Complex Systems Group, Electrical and Systems Engineering Department, **University of Pennsylvania**, July 2016
  - “Optimal Control of Epidemics in the Presence of Heterogeneity”, Rohani Lab, Biology Department, **University of Georgia**, July 2016
  - “Optimal Control of Epidemics in the Presence of Heterogeneity”, Ferrari Lab, *remotely*, Center for Infectious Disease Dynamics (CIDD), Biology Department, **Pennsylvania State University**, July 2016
  - “Optimal Control of Epidemics in the Presence of Heterogeneity”, Center for Communicable Disease Dynamics (CCDD), Harvard T.H. Chan School of Public Health, **Harvard University**, July 2016

## Selected Service

- Reviewer for:
- IEEE Transactions on Automatic Control
  - IEEE Transactions on Control of Networked Systems
  - IEEE Transactions on Information Theory
  - IEEE Transactions on Mobile Computing
  - IEEE Transactions on Networking
  - IEEE Transactions on Network Science and Engineering
  - IEEE Transactions on Wireless Communications
  - IEEE Communication Letters
  - Automatica
  - ASME Journal of Dynamic Systems
  - Performance Evaluation (Elsevier)
  - IEEE WiOpt'16
  - IEEE MIM'16

Convener of the Penn ESE Graduate Student Colloquium 2014 and Penn ESE Graduate Student Lunch 2013

## Selected Coursework

### Selected Coursework – Graduate

- |              |   |
|--------------|---|
| Optimization | Optimal Control, Dynamic Programming, Convex Optimization, Adv. Algorithms      |
| Probability  | Eng. Probability, Adv. Probability, Stochastic Processes, Random Process Models |
| Economics    | Game Theory, Dynamic Games & Social Learning, Information Theory, Estimation    |
| Networks     | Dist. Dynamic Systems, Network Theory, EE Infrastructure, Green Buildings       |

### Selected Coursework – Undergraduate

- |             |  |
|-------------|--|
| Control     | Linear Control Systems, Linear Algebra, Numerical Methods                    |
| Mathematics | Engineering Mathematics, Ordinary Differential Equations, Probability        |
| Signals     | Speech Processing, Digital Signal Processing & Lab, Signals & Systems        |
| Coding      | C++ Programming, Machine Language & Architecture, Microprocessors            |
| Networks    | Wireless Communication, Digital Communication & Lab, Traffic Control         |
| Energy      | Power Systems Analysis, Electrical Machines (I, II, & Lab), Fields and Waves |

---

## Professional Experience

2014–2016 **Founder and Advisor**, *SmartTrack*, Philadelphia, PA.

- As part of a pro-bono student project at the University of Pennsylvania, I helped develop a solution for managing inventory (e.g., textbooks, musical instruments, and computing equipment) for large, low-income school districts such as the School District of Philadelphia.
- We won the Penn Public Policy Challenge '15, and placed second in the National Public Policy Challenge '15.
- Interviewed and received support from local, state, and national politicians and educators
- Our work has been featured in numerous publications, including *Governing* magazine
- My team members were one of 9 out of 300 teams accepted to EDSi accelerator at Penn

2015–2016 **VP of Education**, *Cornell Graduate Consulting Club*, Ithaca, NY.

- Created and curated an ongoing progression of 7 events to increase interest and improve consulting success in the membership
- Put together and MC'ed a panel of Advanced Degree consultants
- Led a team of 6 to devise a marketing plan for a local mobile tourism startup

2014–2015 **Co-chair**, *Penn Graduate Case Competition*, Philadelphia, PA.

- I organized the logistics, client selection, case creation, and sponsorship with my team and MC'ed the event.
- We out-raised our max cost projections by 110% and increased diversity of internal and external participants
- Winning proposal was implemented by client within 3 months
